

Pediatric Patient Return Electrode Pad

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

Pediatric Patient Return Electrode Pad

To address the small patient size and fragile skin challenges pediatric electrosurgery poses, the Pediatric Mega Soft® reusable return electrode. The Pediatric Mega Soft contains the same proven current limiting technology of the standard Mega Soft that automatically limits circuit current in the event of contact disruption. Measuring 26 by 12 inches at half an inch thick, the pad is sized to fit easily in a bassinet/isolette or on the OR table. The infant may be placed directly on the pad, sized to extend the length and width of the patient's body.
