

## Xenon Replacement Lamps

The 300 and 175 watt "VAC" ceramic xenon replacement lamps are backed by a 700 hour non-prorated warranty and typically exceed 1,000-hour lifetimes. The "VAC" ceramic xenon lamps, with patent pending designs, ensure enhanced lumen maintenance and higher arc stability in medical lighting systems. The VAC300-F-C5 and VAC175-F-C parabolic lamps are manufactured in a U.S. facility using advanced tooling, modeling software and optical designs. The lamps are designed to replace existing 300 and 175 watt lamps used in many surgical and medical fiber-optic illumination systems in the market.
