## Ductless Vapor Control System

**PCI Medical** offers the ductless GUS Vapor Control Systems that allows safe disinfection of endoscopes. The system can act as a back-up to automated reprocessors. Harmful vapors from OPA and glutaraldehyde are trapped in a patent filter and clean air is returned to the room. The system also exhibits:

- A built-in system for the safe transfer of used disinfectant.
- Availability in space saver and elevated models with a selection of soak trays.
- Compliance with OSHA and JCAHO requirements.
