

Integrated Tracking and Compliance

Omniceil, Inc. introduces its Omnicell Tissue Center solution that, with the latest release of Omnicell OptiFlex® 10.0 advanced supply chain management software, helps hospitals increase efficiency of tissue tracking processes and comply with regulations and recommendations by the Joint Commission and Association of periOperative Registered Nurses (AORN). According to the company, the solution offers:

- Bar code and touch screen technology for ease-of-use and accuracy.
- The option of open or closed cabinet management.
- FlexLock, a remote locking mechanism with TempCheck, which monitors refrigerator temperature continuously.
- Ability to electronically manage and document control of tissue specimens.
