

Abdominal Binder

Dale Medical Products, Inc. introduces the Dale® Abdominal Binder with EasyGrip® Strip, a fully-adjustable abdominal binder ideal for use after open abdominal and plastic surgery procedures. The new product is a post-operative support that provides:

- Full, all-around compression.
- Perfect sizing.
- The ability to hold up to four 100cc drainage bulbs securely without pins or tape.
- The ability to expedite the return of pulmonary function after open abdominal surgery.
- A strip holder that has hook-and-loop construction to let clinicians easily reposition, monitor and empty multiple drainage bulbs.
- Latex-free stretch material, with a gap-free stitch to prevent skin migration.
- The ability to only stretch in 1 direction to prevent riding, roping and folding over.
- The ability to lessen the chance of sedentary complications, encouraging patients to ambulate sooner.
- Availability in 11 sizes ranging from 6" W by stretching from 28" to 52", and up to 15" W by stretching from 82" to 94".
