Double-Headed Cleaning Brush

Spectrum Surgical Instruments Corp. introduces a new brush design. The unique, double-headed cleaning brush features:

- 1 brush head with nylon bristles and another brush head with stainless steel bristles for more aggressive cleaning.
- The ideal design for cleaning surgical instruments, including the serrations and box-lock areas of hemostats, needleholder jaws, scissors and all orthopedic instruments.
- Stainless bristles that will not harm the finish of surgical instruments.
- Nylon bristles that are made using anti-microbial, white, medical-grade nylon.
- Full reusability.
- Availability in packages of 3.
