

Herculean Strength

Skytron's Hercules 6701B Surgical Table provides a powerful 1,200-lb. lift, 1,000 lb. articulation and full-body imaging capability for today's advanced general purpose and bariatric procedures, reducing the need for multiple support accessories and optimizing ease of patient set-ups. Additional features include:

- 210 degree top rotation.
- 23" low table height. 30 degree patient articulation with full table functions, removable back and leg sections and a durable, back-lit, 1-touch pendant control.
- Optional accessories including carbon fiber back/leg section attachment, a power shoulder arthroscopy positioner and/or heavy duty split leg accessories and a full line of general purpose and bariatric table accessories.
- The company also offers the UltraSlide 3600B full function, top slide surgical table for general and bariatric procedures.
