Versatile, Configurable Boom

BERCHTOLD's TELETOM® Equipment Management System is a versatile,

Versatile, Configurable Boom

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

configurable and easy-to-use boom.

According to the company, features include:

- The ability to be custom-configured to enhance specific OR environments.
- A design that allows nearly everything needed for a case to be within grasp.
- The ability to build in room for growth and change.
