

Visualization & Equipment Management System

CompView Medical delivers high-efficiency MIS capabilities for operating and procedure rooms with a demonstrated return on investment. The NuBoom® Visualization and Equipment Management System features:

- Transformation of a standard OR into a clutter-free, integrated digital OR in as little as two days, virtually eliminating OR downtime.
- The DOCS® Digital Operating Control System, an intuitive, touch panel-based routing and control system.
- An open architecture design that supports multiple camera brands and displays multiple source inputs including endoscopic or other video, PACS, RIS, EMR and physiologic patient monitors.
- The ability to improve team ergonomics, productivity and safety.
