

Mechanical Performance, All-Natural Coating

Atrium Medical Corporation introduces its C-QUR™ V-Patch, indicated for use in the surgical repair and reinforcement of soft tissue, including hernia repair. Features of the product include:

- A combination of mechanical performance with the inflammation reducing properties of an all-natural Omega 3 fatty acid bioabsorbable coating.
- A design for umbilical, epigastric, trocar-site, and other small abdominal wall hernia repairs.
- The ability to offer long-term protection from visceral tissue attachment when placed intra-abdominally.
