

Clinical Inventory Management Systems

This web-based solution tracks clinical inventory utilizing manufacturer barcode labels and allows for adding on RFID-enabled carts to securely store and automatically account for implants and clinical inventory.

November 10, 2009

Stanley InnerSpace announces that SpaceTRAX has been awarded the Novation contract to provide RFID and barcoding clinical inventory management solutions to its members. Novation is the healthcare industry's leading supply contracting company, providing savings to members and affiliates of VHA Inc., the University HealthSystem Consortium, and Provista.

SpaceTRAX is a web-based solution that tracks clinical inventory utilizing manufacturer barcode labels and allows for adding on RFID-enabled carts to securely store and automatically account for high-dollar implants and clinical inventory. According to the company, additional features include:

- The ability to provide operational benefits including optimized workflow, increased charge capture, expiration management and valuable usage reports by patient and physician.
- The ability to fit easily within existing clinical workflow.
- The ability to be utilized independently or interfaced into existing hospital information systems.
