

## Lavender Nitrile Exam Glove

Kimberly Clark's new KC100 Lavender Nitrile Exam Glove is an alternative to vinyl gloves in barrier protection, performance and comfort by keeping hands cool, creating less hand fatigue and yielding significantly more tactile sensitivity and hand movement. According to the company, the Lavender Nitrile features:

- The ability to keep hands cool and create less hand fatigue.
- The ability to yield more tactile sensitivity and hand movement.
- A thin and light design.
- The ability to retain the protective properties required for a wide range of tasks such as dispensing general medications, routine oral care and non-invasive general physical examinations.
