

Surgery Anti-Fatigue Mats With Add-On Ergonomic Riser

Medicus Health offers our new Surgery Anti-Fatigue Mat with Ergonomic Riser to help eliminate surgeon and nurse leg/foot fatigue while standing for long hours on hard surfaces during long cases. This wide, comfortable platform with mat is available in three different height increments and two different lengths, and features:

- Risers that easily stack on top of one another to help compensate for different table heights.
- The ability for the anti-fatigue mats to be completely autoclaved up to 250 deg. F and easily cleaned and wiped down with any diluted bleach or alcohol-based solution.
- The ability for the mat to attach to durable molded plastic riser platform via 4 Phillips head screws which can be removed and reattached for cleaning purposes.
- Beveled edges on the mats to help reduce trip hazards associated with foam mats that tear and damage over time.
- Availability of surgery anti-fatigue mats as a stand-alone item for surgical floors to help reduce leg/foot fatigue.
