

Digital "Communicator"

Vision USA's digital "Communicator" is a camera/video that is mounted on an adjustable stand, allowing the user to capture and transmit images of specimens, disease analysis, insects, skin, alloy, etc. at 10x - 200x, 500x with LED lighting. Additional features include:

- The ability for the system to automatically attach the photo/video to an e-mail server.
- Availability of microscope eyepiece adaptors to convert an existing microscope into a digital camera.
