

LED Light Series

The new LUCEA™ LED Light series from MAQUET brings MAQUET surgical lights to the smaller venue of the ICU, cath lab, and clinic. Utilizing an effective combination of LEDs and special HECOL lenses, LUCEA produces a light with exceptional shadow dilution. Additional features include:

- A unique, arrow-shaped light head design helps focus the light precisely at the desired site.
- A closed casing that facilitates ease of cleaning and enhances ergonomics.
- Ideal use for dermatology, gynecology, and minor surgical procedures with the availability in ceiling mount and wall mount models in addition to mobile versions.
