1,000-lb Patient Weight Capacity

The TRUMPF TITAN is a modular, split-leg, fully-articulating universal surgical table with a 1,000-lb. patient weight capacity. Features of the table include:

- Motor driven mobility and easy movement with 6" dual castors.
- 40° Trendelenburg and reverse Trendelenburg positioning and 25° degree tilt, maintaining stability even at extreme angles at full weight capacity.
- 12" longitudinal slide.
- 100% C-Arm access.
- Head-to-toe X-ray channel.
- Optional carbon fiber components providing superior intra-operative imaging capability. Electro-mechanical, hydraulic-free.
