

Electrosurgical Generator

The Bovie® ICON GP is an electrosurgical generator with fully-digital implementation for use in today's modern operating rooms. It was designed in conjunction with OR clinicians to provide a safe, user-friendly unit that can meet all operating room procedure demands. Features include:

- A touch-Screen interface with high resolution TFT color display and no buttons or knobs.
- A swivel bezel that allows the screen to be viewed from almost any angle.
- Intuitive graphical user interface for quick setup and settings adjustments.
- A Physician Preference database allowing for a quick changeover between cases.
- Required use of only split pads.
- Common Sense error messaging to help prevent misinterpretation.
- Laparoscopic Modes to help prevent capacitive coupling induced burns.
- Digitally controlled outputs and user interfaces allowing new modes to be added.
- Multiple communication ports (i.e. USB, RS 232 and Ethernet) to link up with other equipment in the operating room (OR).
- A New Accessory connector for future devices.
