## Gel Support Pad

Innovative Medical Products introduces the Phase 4™ Gel, a soft, light gel support pad to aid in the prevention of pressure sores. Features of the pad include:

- Light weight.
- A micro-thin coating allowing it to move with the patient's skin to minimize skin shear forces.
- Ideal use in long-term care situations.
- The ability for the gel material to not leak or ooze out should its outer skin be punctured.
