

Autoclavable Containers

Ruhof's new line of autoclavable instrument trays, kidney dishes and bowls are made of medical grade polypropylene that can withstand the high temperatures of autoclaving without cracking, discoloring, rusting, staining, and denting.

According to the company, this new line features:

- Reusable.

-

Lightweight.

- Availability in various sizes to meet decontamination needs.
- Easier to clean, as show by independent tests comparing stainless steel products.
