

Disposable Side-Opening Speculum With Disposable Light Source

OBP Medical offers the first disposable side-opening speculum with disposable LED light source to the medical community. For single use only, the OfficeSPEC eliminates the time and expense of reprocessing and reduces the chance of cross-contamination in medical setting.

With an open side for improved instrument access and easy removal, the OfficeSPEC also features a built-in, hands free, disposable light source (will provide 2 hours of light) and smoke channel. Smoke channel Xmas tree adapter is sold separately for connection to any size evacuation tubing.
