Mat Absorbs Surgical Fluid

Aspen Surgical announces a new addition to the company's Fluid Management Line: the SurgiSafe® CinchMat™. According to the company, the product combines effective absorbency with an easier way to handle the mat during disposal. Additional features include:

- The top layer that has superior wicking ability to quickly absorb fluids to prevent pooling and splashing.
- Skid resistant backing that ensures the floor beneath the mat remains dry.
- A pull cord design to use in disposal for faster cleanup.
