

Micro-LED Headlight

QED Medical introduces the EOS 3 Watt LED Headlight optic weighs in at only .4 of an ounce and provides variable intensity up to 4,500-foot candles of white light into the field.

The EOS headlight is available on a comfortable headband or on a variety of clips to accommodate most common loupes and eyewear. Power is provided by a lightweight, clip-on, lithium ion battery pack that delivers seven hours of full intensity and a short 3-hour charge time. A universal power charger completes the system.

QED Medical has plans to introduce the EOS-I in the fall integrating 3-watt LED illumination with an iris to deliver true spot adjustability.
