

MiniLap Instruments

Stryker's MiniLap instrument line allows for access and instrumentation in one laparoscopic device.

According to the company, the instruments are designed percutaneous entry through the abdominal cavity, and feature:

- A diameter of 2.3 mm.
- Availability in 4 tip styles for a variety of laparoscopic procedures.
- An ultra slim design and incisionless entry capabilities, allowing for reduced scarring.
- The ability to allow for less invasive standard laparoscopic procedures and aids in single incision surgery and enables needlescopic technique.
