

Knotless Anchor For Rotator Cuff Repair

DePuy Mitek, Inc. introduces the VERSALOK® PEEK, a nonmetallic, self-punching rotator cuff anchor that is 100 percent radiolucent and knotless. The new anchor eliminates the need to pre-awl a pilot hole (except in very hard bone), will not interfere with MRI scans and allows sutures to be affixed more quickly because knot-tying is not required. According to the company, features include:
