

## SolidCare Cabinetry

Skytron SolidCare solid surface cabinetry and workstations are manufactured from DuPont Corian and offer a wide menu of vibrant, healing colors for the healthcare space. Unlike traditional cabinetry, SolidCare surfaces are without seams or crevices, eliminating places where potentially infectious microorganisms, such as Methicillin-Resistant Staphylococcus Aureus (MRSA), can otherwise hide. SolidCare's seamless beauty and durability also provides superior efficacy for cleaning, increasing patient and staff safety. SolidCare is also available in LEED certified colors manufactured with a minimum of 12 percent recycled content.
