

Hernia Graft With Long-Term Strength

Cook Medical offers the Biodesign™ Hernia Graft, a product in which a five-year study recently demonstrated that it possesses the clinically important strength of non-absorbable mesh, while providing the benefit of decreased infection complications of absorbable mesh. According to the company, features of the Biodesign include:

- The ability to provide signals and support for the body to restore itself.
- Incorporation of attributes of a biologic graft—complete remodeling and resistance to infection.
