

## **Real-Time Location System Tracks Equipment And Patients**

VHA, Inc. has selected RadarFind, a TeleTracking company, to provide its real-time locating distributed sensor network to VHA's 1,400 member hospitals to track equipment, patients and staff for improved operational efficiency and patient care.

According to the company, RadarFind's patented real-time location system (RTLS) will help VHA members reduce capital expenditures and staff time spent on routine processes.

RadarFind's Real Time Location System uses an innovative wireless sensor network platform for tracking medical equipment and patients that is highly accurate, yet
