

Anterior Thoracolumbar Plating System

Lanx, Inc. introduces its Epic™ Anterior Thoracolumbar Plating System (Epic™ System) at the 2011 American Academy of Orthopaedic Surgeons (AAOS) Annual Meeting in San Diego, CA. The Epic™ System is an anterior fixation device for use in anterior thoracolumbar fusion procedures. The low-profile plate has been designed for versatility and simplified placement with a single-step cover plate to prevent screw back out and reduce surgical steps involved with traditional anterior plating procedures. The system includes lumbar and sacral plate options and is available in a wide range of sizes to accommodate different patient anatomies.
