

da Vinci Retraction System

Automated Medical Products has unveiled their new retractor system for use with the da Vinci Robotic Surgical System – the Giulianotti™ Retractor System for assisting with a robotic thyroidectomy without a neck incision. The new system was developed with Pier Cristoforo Giulianotti, MD, FACS, a world-renowned robotic surgeon, president of the Clinical Robotic Surgery Association, tenured professor of surgery and Chief of General, Minimally Invasive and Robotic Surgery at the University of Illinois at Chicago.
