

Fluid Waste Disposal Systems

MD Technologies offers the Environ-mate™ DM6000 Series Suction-Drain™ Systems for fluid waste disposal provide fluid waste management for Surgery, Endoscopy and SPD/Utility Room applications. According to the company, features of the compact, wall-mounted systems include:

- The ability to eliminate costs associated with disposable supplies and waste disposal.
- The ability to dispose of fluid directly from the suction field to the sewer, isolating staff from exposure.
- Availability of three units: the DM6000 used in SPD/Utility Rooms with an optional footswitch; the DM6000-2 for Endoscopy, which has two independent suction inputs for EGD, ERCP and Bronchoscopy procedures; and the compact DM6000-2A with unlimited fluid capacity to accommodate Arthroscopy, Urology and Cystoscopy procedures.
- An optional fluid totalizer records fluid volume aspirated for the DM6000-2A.
