

Anti-Microbial Suction Mat

March 18, 2011

The Suctioner™ is an anti-microbial surgical mat which incorporates powerful, quiet suction capability with anti-fatigue properties. Designed in conjunction with world-class surgeons and nurses, The Suctioner™ incorporates a proprietary, highly-effective vacuum system which is a workhorse at suctioning all fluids coming down from the operative site onto the mat. Utilizing standard OR suction tubing in any length, it easily attaches to the operating room suction source to ensure a drier, safer and cleaner surgical experience. According to the company, additional features include:

- Quiet, continuous suction.
- Reduced need for laundry on the floor.
- The ability to help achieve shorter room turnover times.
- Comfortable use.
