# Mattress Overlay With Enhanced Handwells

EHOB, Inc. introduces a new, stronger handwell design on all WAFFLE® Mattress Overlays. The patent-pending, dog-bone shaped handwells, located around the perimeter of the product, naturally contour to the hand for an easy grip and a firm hold. With the updated design, caregivers maintain a comfortable, more secure stance while moving patients.

The dog-bone handwells are one of a kind in the healthcare industry and have been added to all WAFFLE Brand Mattress Overlay models. The handwells offer ease of use to the caregiver when turning and mobilizing a patient. And, unique to the WAFFLE Overlays, the new design also assists in patient transfers.
