

Vacuum Pumps

Medela, Inc's Vario 18 AC, Vario 18 AC/DC or Vario 18 AC/DC C/I are used for aspiration, ears, nose and throat, gastroenterology and tracheostomy. It can be used in wound drainage, in airway support, and respiratory support. The Vario 18 removes surgical fluids, bodily fluids, tissue, bone, gases and infectious materials. The Vario 18 is used during surgery or at the patient's bedside. Our customers use this pump when transferring patients, on crash carts, in treatment centers/ambulatory care centers, physician offices, as well as nursing homes. Small, light and quiet. Models available with battery incorporate 3 warning signals.
