

Absorbable Wound Closure Device

Covidien's V-Loc™ Absorbable Wound Closure Device supports optimal patient outcomes by closing wounds securely – without the need to tie knots and without changing your standard closure technique. The V-Loc™ 90 and V-Loc™ 180 absorbable wound closure devices give surgeons a more comprehensive solution for short and long-term wound closure needs in open and laparoscopic procedures.

- Unidirectional barb design distributes tension across wound, while loop anchors the device securely at the beginning of incision line
- Closes wound up to 50% faster¹
- Has the potential to reduce knot-related complications
