

Portable Or Mobile Vacuum Pump

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

Portable Or Mobile Vacuum Pump

Medela Healthcare offers the Basic 30 Portable or Mobile medical vacuum pump. Applications for this pump are in aspiration and for endoscopy. This pump is used during surgery or at the patient's bedside and is also used in the ER and OR.

The pump is used for general surgery in treatment centers/ambulatory care centers, physician offices and dental clinics. Additional features include rapid vacuum buildup, powerful suction and precise vacuum, and a size that fits into endoscopy tower.
