

## Silver Fabric For OR Tables, Stretcher Pads

Action Products, Inc. will now offer a Silver fabric upgrade on all its O.R. Table and Stretcher Pads. For centuries, Silver has been used to stop the spread of bacteria. Today, we know that using this metal ion can proactively mitigate most of the common bio-burdens on the surface of medical devices.

Silver fabric properties include:

- Proactively attacks bacteria
- Reduce odors
- 4-way stretch comfort
- Maximum infection control
