

# Chlorhexidine Gluconate Skin Cleansing Kit

Recent evidence-based scientific and clinical studies support preoperative skin cleansing with Chlorhexidine Gluconate (CHG) as an effective strategy for reducing the risk of postoperative surgical site infections. This CGH skin cleansing kit from Aplicare provides a convenient way to help the patient become a partner in infection prevention. The kit contains a 4oz bottle of 2% or 4% CHG along with five ultra-soft towels in an easy to use platform for patients to cleanse with prior to surgery. Improving patient outcomes, and reducing risk of cross contamination. Features include

- CHG Solution
- With persistent antimicrobial action, CHG Skin Cleanser attacks a wide range of microorganisms.
- Ultra Soft Towels
- Softness, strength, absorbency – this fabric provides softness and strength superior to traditional wipes. Excellent for applying skin care treatments.
