

HD Wireless Video Technology

ZeroWire® is NDssi's medical grade HD wireless video technology that is customized to meet the video transmission challenges of the operating room. It has been designed to provide robust, reliable communication with ultra-low latency and excellent image quality required for today's multi-modality imaging environments. This wireless system, made especially for the OR, facilitates faster turn-around time by eliminating down-time from disconnected or damaged cables and by reducing the cleaning time between procedures.
