

Intra-Operative Adjustable Stirrups

Schuremed's E-Z Lift Great White Intra-Operative Adjustable Stirrups feature a Dual Control Handle that permits simple adjustment of lithotomy; with a trigger for separate abduction positioning intraoperatively. The Dual Handle optimizes patient safety and surgical site exposure. The Great White comes fully assembled. Boot liners and mounting clamps are included. With a 600 lb. weight capacity the boot free floats throughout the range reducing the risk of superficial nerve injury. The Great White Stirrup provides safe comfortable and secure positioning.
