Secondary Bandage

The Action Bandage from RG Medical Diagnostics is a new secondary bandage that is designed to hold dressings in place without the need for tape, adhesives, or fasteners.

Action Bandage is reusable and constructed from a thermo-elastic polymer that conforms to the contours of the body without constricting, hair pulling, or tearing of the skin.

It is latex-free, non-irritating, durable, non-absorbent, and patients can retain full range of motion without losing bandage retention. Action Bandage can be cleaned with a mild soap or any non-petrochemical disinfectant.
