

100 Percent Recycled Storage Bins

Akro-Mils, a manufacturer in storage, organization and transport products, introduces four new sizes in its popular EarthSaver® Series — featuring AkroBins® and Shelf Bins made from 100 percent recycled plastic. New bins in the series include AkroBin models 30234 (14-3/4" L x 5-1/2" W x 5" H) and 30239 (10-3/4" L x 8-1/4" W x 7" H), and Shelf Bin models 30110 (11-5/8" L x 2-3/4" W x 4" H) and 30150 (11-5/8" L x 8-3/8" W x 4" H).

The EarthSaver Series offers users an eco-friendly choice in plastic storage and organization products, while boosting productivity in the workplace. Made from 100 percent recycled plastic, the bins help companies and organizations make a positive impact on the environment. Bins are available in three colors — Hunter Green, Sandstone and Terra Cotta.

The industry standard for storage bins, AkroBins help control inventories, shorten assembly times and minimize parts handling. Molded of high-impact polypropylene, AkroBins are unaffected by weak acids and alkalis. Its sturdy, one-piece construction is water, rust and corrosion-proof.

Akro-Mils' Shelf Bins outlast corrugated bins — paying for themselves in reduced replacement costs. Superior construction allows Shelf Bins to be fully loaded without spreading or cracking.

Designed for use in virtually any setting — including assembly, distribution, manufacturing, general maintenance, retail, supply and healthcare — AkroBins and Shelf Bins in the EarthSaver Series can be used alone or with Akro-Mils' steel shelving, wire shelving and pick racks to create a complete storage and organization system supporting 5S Lean and other initiatives.
