

ACE Blade From Megadyne

The ACE Blade cuts like a scalpel without having a sharp edge. Used with the Mega Power electrosurgical generator, the ACE Blade is a single tool that cuts, coagulates and dissects, reducing the need to pass scalpels and conventional electrosurgical blades back and forth. The generator automatically adjusts the power to the ACE Blade to provide a smooth consistent feel and minimal thermal necrosis. Because the blade is coated in Megadyne's proprietary E-Z Clean® PTFE non-stick coating eschar buildup is reduced. ACE Blade electrodes are available in 2.75 inch; 4.0 inch and 6.5 inch lengths and pre-loaded into Megadyne's electrosurgical pencils.
