PerfecTemp Patient Warming System

Medline's new PerfecTemp OR table pad helps meet SCIP-Inf-10 by combating hypothermia and reduces the risk of pressure ulcers. It is the only warming system available that monitors the temperature at the point of contact between the pad and the patient's skin — ensuring the patient's temperature is constantly monitored and maintained for normothermia. PerfecTemp's unique and reusable surgical table pads offer silent warming from underneath, allowing effective patient warming — even during C-sections and heart and spinal procedures.
