

Semperedmed Supreme Surgical Gloves

Surgeons' hands are the most delicate instruments in the surgical suite. They need to be prepared and protected. That's why Semperedmed developed their Semperedmed Supreme surgical gloves. These unique gloves are anatomically designed to reduce hand fatigue and increase comfort with a special multi-layer copolymer composition that provides optimal protection during surgery.

For the latex sensitive, Semperedmed Syntegra CR offers a similar fit and feel to latex. These quality surgical gloves are manufactured with polychloroprene, also known as neoprene, a trusted material with over 70 years of proven performance. They provide excellent tactile sensitivity, along with a textured surface and beaded cuff that enhance grip and protection.
