

Unitrac® Retraction & Holding System For Open And Minimally Invasive Surgery

The pneumatically-powered Unitrac® Retraction and Holding System from Aesculap, Inc. increases procedure efficiency and allows for an obstruction-free surgical site in both open and minimally invasive surgery. Precise adjustments are possible with the push of a single button, thus freeing the surgical assistant to carry out higher priority tasks. The Unitrac® is capable of holding all 3.0-7.5mm and 10mm diameter instruments and endoscopes. An extensive selection of retractor blades and instrument holders is also available for open surgery.
