ABBI Absorbent Mat

Graham Medical has introduced a superior fluid management solution for healthcare facilities with the new ABBI™ Absorbent Mat. The ABBI mat, constructed to absorb more than 19 times its weight in fluid, has a non-skid poly backing to keep floors dry, clean, and slip-free. Proudly made in the USA, the ABBI mat effectively retains body fluids to prevent staining, minimize cross-contamination, and enable quick and efficient room turnover. The product is available immediately through select distributor partners.
