

Endo360° MIS Suturing Device

EndoEvolution, LLC has launched the Endo360°™ MIS suturing device. In addition, the company is developing the 5mm EndoTransformer™, the world's smallest automated MIS suturing device. EndoEvolution's patented Endo360° and EndoTransformer devices are the only automated MIS suturing devices using curved needles and precisely replicating the traditional methods used by surgeons to place stitches and tie intracorporeal knots.
