

Surgical Table Rebuild Program

H&S Medical offers the 3080 and 3085 Steris/Amsco Surgical Table Rebuild program. If a 3080 or newer 3085 table is wobbly, or is considered broken and unrepairable, the company remedies the problem cost-effectively and time efficiently, even if the column or seat section is considered damaged. Typical tables can be rebuilt within 5 to 7 days or less with a scheduled service appointment.
