

Chlorhexidine Gluconate Cleansing Kit

Blue Ribbon Winner - Infection Control Category

This CHG skin cleansing kit from Aplicare provides a solution to help the patient become a partner in infection prevention. The kit contains a 4-oz. bottle of 2 percent or 4 percent CHG along with five ultra-soft towels for patients to cleanse with prior to surgery in order to reduce risk of cross contamination and improve patient outcomes. Features include:

- CHG solution.
- With persistent antimicrobial action, CHG Skin Cleanser attacks a wide range of microorganisms.
- Ultra soft towels.
- Strong, absorbent fabric that also provides softness.
