

## Kind Removal Silicone Tape

3M Kind Removal Silicone Tape, a next generation medical tape introduced by 3M Skin and Wound Care, features a new proprietary silicone adhesive technology to provide an optimal balance of reliable adhesion and gentle, atraumatic removal. The new technology allows this tape to be repositioned and removed easily from patients' skin, minimizing the likelihood of tape-related skin injury. The skin-friendly characteristics of 3M Kind Removal Silicone Tape are particularly important for patients with sensitive, compromised or at-risk skin, or those who may require repeat taping.
